A Moment in the Sun Oct 12 2021 It's 1897. Gold has been discovered in the Yukon. New York is under the sway of Hearst and Pulitzer. And in a few months, an American battleship will explode in a Cuban harbor, plunging the U.S. into war. Spanning five years and half a dozen countries, this is the unforgettable story of that extraordinary moment: the turn of the twentieth century, as seen by one of the greatest storytellers of our time. Shot through with a lyrical intensity and stunning detail that recall Doctorow and Deadwood both, *A Moment in the Sun* takes the whole era in its sights—from the white-racist coup in Wilmington, North Carolina to the bloody dawn of U.S. interventionism in the Philippines. Beginning with Hod Brackenridge searching for his fortune in the North, and hurtling forward on the voices of a breathtaking range of men and women—Royal Scott, an African American infantryman whose life outside the military has been destroyed; Diosdado Concepción, a Filipino insurgent fighting against his country's new colonizers; and more than a dozen others, Mark Twain and President McKinley's assassin among them—this is a story as big as its subject: history rediscovered through the lives of the people who made it happen.

After the Sun Nov 01 2020 "Relentlessly thrilling . . . an orgy of the unpredictable." -New York Times Book Review "Like Thomas Pynchon taking on late capitalism. . . . surrealistic, granular in its details, and concerned with social entropy and desperate attempts at communion." -Wall Street Journal From a major new international voice, mesmerizing, inventive fiction that probes the tender places where human longings push through the cracks of a breaking world. Under Cancún's hard blue sky, a beach boy provides a canvas for tourists' desires, seeing deep into the world's underbelly. An enigmatic encounter in Copenhagen takes an IT consultant down a rabbit hole of

speculation that proves more seductive than sex. The collapse of a love triangle in London leads to a dangerous, hypnotic addiction. In the Nevada desert, a grieving man tries to merge with an unearthly machine. After the Sun opens portals to our newest realities, haunting the margins of a globalized world that's both saturated with yearning and brutally transactional. Infused with an irrepressible urgency, Eika's fiction seems to have conjured these far-flung characters and their encounters in a single breath. Juxtaposing startling beauty with grotesquery, balancing the hyperrealistic with the fantastical—"as though the worlds he describes are being viewed through an ultraviolet filter," in one Danish reviewer's words—he has invented new modes of storytelling for an era when the old ones no longer suffice.

The Sun Is Kind of a Big Deal Mar 05 2021 A hilarious nonfiction picture book from the New York Times bestselling author and creator of Awkward Yeti. Oh hey, guess what? The Sun never stops working to keep things on Earth running smoothly. (That's why it's been Employee of the Month for 4.5 billion years.) So why does the Sun get to be the center of attention? Because it's our solar system's very own star!

This funny and factual picture book from Awkward Yeti creator Nick Seluk explains every part of the Sun's big job: keeping our solar system together, giving Earth day and night, keeping us warm, and more. In fact, the Sun does so much for us that we wouldn't be alive without it. That's kind of a big deal. Each spread features bite-sized text and comic-style art with sidebars sprinkled throughout. Anthropomorphized planets (and Pluto) chime in with commentary as readers learn about the Sun. For instance, Mars found someone's rover. Earth wants the Sun to do more stuff for it. And Jupiter just wants the Sun's autograph. Funny, smart, and accessible, *The Sun Is Kind of a Big Deal* is a must-have!

Staring at the Sun May 19 2022 Written in Irv Yalom's inimitable story-telling style, *Staring at the Sun* is a profoundly encouraging approach to the universal issue of mortality. In this magisterial opus, capping a lifetime of work and personal experience, Dr. Yalom helps us recognize that the fear of death is at the heart of much of our anxiety. Such recognition is often catalyzed by an "awakening experience"—a dream, or loss (the death of a loved one, divorce, loss of a job or home), illness, trauma, or aging. Once we confront our own mortality, Dr. Yalom writes, we are inspired to rearrange our priorities, communicate more deeply with those we love, appreciate more keenly the beauty of life, and increase our willingness to take the risks necessary for personal fulfillment.

I Held the Sun in My Hands May 07 2021 "I Held the Sun in My Hands" is the story of a young girl raised in a traditional Jewish family in Hungary prior to and during WWII. When Germany occupied Hungary on March 19th, 1944, Erika Jacoby was deported to Auschwitz, together with her mother. She was among the youngest that escaped the selection of Dr. Mengele and together with her mother, who was among the oldest, she endured and outlasted the atrocities and deprivations of the Nazi persecutors. In her book she describes how the teachings and values that she absorbed and incorporated into her life in her home helped her survive Auschwitz and the other concentration camps. She writes movingly about her painful disappointments in the behavior of her fellow human beings, while never losing her faith in God. This unshakable trust in the divine personal protection inspired others as well not to give up hope. In her memoir we witness how this young girl took upon herself the enormous responsibility for her mother's survival, and the impact of that on their relationship after the war and, indeed, throughout their lives. The author, a clinical social worker, examines this relationship with much insight and compassion.

This book is a remarkable account of one person's resiliency, ability to cope with adversity and survive not only physically but also spiritually.

Imprisoned in a Japanese concentration camp, he is witness to the fierce white flash of Nagasaki, as the bomb bellows the end of the war...and the dawn of a blighted world. Seasons in the Sun Mar 29 2023 The late 1970s were Britain's years of strife and the good life. They saw inflation, riots, the peak of trade union power - and also the birth of home computers, the rise of the ready meal and the triumph of a Grantham grocer's daughter who would change everything. Dominic Sandbrook re-creates this extraordinary period in all its chaos and contradiction, revealing it as a turning point in our recent history, where, in everything from families and schools to punk and Doctor Who, the future of the nation was being decided. 'A brilliant historian.' A. N. Wilson, Spectator 'Magnificent . . . If you lived through the late Seventies - or, for that matter, even if you didn't - don't miss this book.' Mail on Sunday

'Entertaining, engaging, masterful, a joy . . . as a storyteller, Sandbrook is superb.' Sunday Telegraph 'Sandbrook has rummaged deep into the cultural life of the era to remind us how rich it was, from Bowie to Dennis Potter, Martin Amis to William Golding.' The Times 'While Sandbrook punctures some of our favourite myths . . . what makes this book such a pleasure is the sheer, unashamed nostalgia it evokes.' Daily Telegraph 'Compulsively readable . . . Sandbrook is right to argue that the 1970s was the moment when our century arrived.' Guardian

A Season in the Sun Aug 30 2020 WITH A FOREWORD BY COACH BRUCE ARIANS The extraordinary behind-the-scenes story of how Coach Bruce Arians, Tom Brady, and the Tampa Bay Buccaneers came together to deliver one of the most improbable Super Bowl victories in NFL history. The pursuit was so shrouded in secrecy that it was referred to within the Tampa Bay Buccaneers' organization by codename: Operation Shoeless Joe Jackson. Indeed, the prospect of Tom Brady, six-time Super Bowl champion and widely-acknowledged greatest football player ever, joining the Bucs, a historically hapless franchise that hadn't made the playoffs in more than a decade, seemed about as likely as Jackson emerging out of an Iowa cornfield in the movie Field of Dreams. But come Brady did. At age forty-three, pushing the boundaries of football mortality and without Bill Belichick by his side for the first time in

his NFL career, this would be the ultimate test for the ultimate football legacy. Brady's new coach, Bruce Arians, also had much to prove. One of the great offensive minds of his generation, Arians returned to coaching in 2018, at the age of 65, in search of the one achievement that had eluded him throughout his illustrious career: a Super Bowl championship. Together, like so many aged snowbirds, Brady and Arians had decamped to Florida to make the most of their remaining years. Renowned sports journalist Lars Anderson was granted extraordinary access to the inner workings of the Bucs' organization. The result is a remarkable work of sports journalism, peppered with wild inside stories and new insights into Brady, Arians, and the Bucs. From the practice facility to the team plane, from the garage where Brady treats his footballs to the huddle on gameday, Anderson captures the rhythms of perhaps the strangest NFL season ever, turned upside down by the COVID-19 pandemic. In his telling, the Bucs' quest for one glorious season in the sun becomes a riveting sports epic.

Chasing the Sun Sep 23 2022 The full story of how our relationship with light shapes our health, productivity and mood. 'A sparkling and illuminating study, one of those rare books that could genuinely improve your life' Sunday Times Since the dawn of time, humans have

worshipped the sun. And with good reason. Our biology is set up to work in partnership with it. From our sleep cycles to our immune systems and our mental health, access to sunlight is crucial for living a happy and fulfilling life. New research suggests that our sun exposure over a lifetime - even before we were born - may shape our risk of developing a range of different illnesses, from depression to diabetes. Bursting with cutting-edge science and eye-opening advice, *Chasing the Sun* explores the extraordinary significance of sunlight, from ancient solstice celebrations to modern sleep labs, and from the unexpected health benefits of sun exposure to what the Amish know about sleep that the rest of us don't. As more of us move into light-polluted cities, spending our days in dim offices and our evenings watching brightly lit screens, we are in danger of losing something vital: our connection to the star that gave us life. It's a loss that could have far-reaching consequences that we're only just beginning to grasp.

And two other scientists employed by the same American forecasting institute have died in suspicious circumstances.
