The Beatles Recording Reference Manual: My Bonnie through Beatles for sale (1961-1964) Feb 22 2020 "The first book of the four-book series, The Beatles Recording Reference Manual: Volume 1: My Bonnie through Beatles For Sale (1961-1964) tracks the evolution of the band from their earliest recordings and initial hits, through Please Please Me, With The Beatles, A Hard Day's Night, and Beatles For Sale. From the first take to the final remix, discover the making of the greatest recordings of all time. Through extensive, fully-documented research, these books fill an important gap left by all other Beatles books published to date and provide a unique view into the recordings of the world's most successful pop music act. The collection and analysis of hundreds of recordings (takes, outtakes, remixes and release versions), books, magazine articles, photos, film and video evidence, and interviews with key engineers who worked on the sessions filter out the noise of myth and conflicting fact to arrive at an accurate telling of the creation of The Beatles classic recordings " --Provided by publisher.

Handbook of Research on Artificial Intelligence Applications in the Aviation and Aerospace Industries Jan 23 2020 With the emergence of smart technology and automated systems in today ' s world, artificial intelligence (AI) is being incorporated into an array of professions. The aviation and aerospace industry, specifically, is a field that has seen the successful implementation of early stages of automation in daily flight operations through flight management systems and autopilot. However, the effectiveness of aviation systems and the provision of flight safety still depend primarily upon the reliability of aviation specialists and human decision making. *The Handbook of Research on Artificial Intelligence Applications in the Aviation and Aerospace Industries* is a pivotal reference source that explores best practices for AI implementation in aviation to enhance security and the ability to learn, improve, and predict. While highlighting topics such as computer-aided design, automated systems, and human factors, this publication explores the enhancement of global aviation security as well as the methods of modern information systems in the aeronautics industry. This book is ideally designed for pilots, scientists, engineers, aviation operators, air crash investigators, teachers, academicians, researchers, and students seeking current research on the application of AI in the field of aviation.

Manual for Draft-Age Immigrants to Canada Sep 23 2022 In print for the first time since 1971, Manual for Draft-Age Immigrants to Canada has once again become relevant in a time of major political upheaval in the United States of America. First published in 1968 by House of Anansi Press, the Manual for Draft-Age Immigrants to Canada was a handbook for Americans who refused to serve as draftees in the Vietnam War and were considering immigrating to Canada. Conceived as a practical guide with information on the process, the Manual also features information on aspects of Canadian society, touching on topics like history, politics, culture, geography and climate, jobs, housing, and universities. The Manual went through several editions from 1968 – 71. Today, as Americans are taking up the discussion of immigration to Canada once again, it is an invaluable record of a moment in our recent history.
