Outsourcing Professional Body of Knowledge - OPBOK Version 9 Apr 26 2020 Outsourcing is here to stay. It is inextricably linked to the globalization of business. International trade networks continue to connect the world's economies and organizations increasingly turn to partners, often through outsourcing, to help them: • better leverage what they are best at • gain greater flexibility and reach, and • drive down their overall business costs and risks. This substantial title is the official version of the Outsourcing Professional Body of Knowledge by IAOP (International Association of Outsourcing Professionals), in short: OPBOK. This is the official publication of OPBOK Version 9. It identifies the best practices of outsourcing professionals around the globe and presents the reader with a complete and practical guide to this emerging, complex discipline. It gives readers full guidance on the critical 'make or break' factors in any outsourcing program: • governance and defining a strategic approach to Outsourcing; • identifying and communicating business requirements; • selecting and qualifying providers; • gaining internal buy-In, creating project teams and • value assessment (value for money and return on investment). This authoritative title provides an invaluable resource for any outsourcing professional: the best practice guidance is complemented by practical checklists and templates. Readers can therefore apply rigorous disciplines to ensure internal and external requirements are fully considered and implemented at each stage of the process. It will become a key desktop resource for successful outsourcing professionals who achieve corporate and personal goals in this field.

Introduction to Technical Services, 8th Edition Dec 15 2021 Used in library schools worldwide, this standard text provides students with a thorough understanding of technical services. Updated and expanded, the eighth edition further emphasizes the rapidly changing environment in which technical services are conducted. The book covers all aspects of the field—from acquisitions to managing the cataloging department—with five new chapters. "Technical Services Issues" includes material related to physical space needs; "E-resources Issues" examines how the growth of e-materials impact technical services work; "Copy Cataloging" reflects the ever increasing need to be more efficient and also to save limited funds for technical services activities; "Overview and Decisions" addresses the issue of why and how the local OPAC has become a gateway to the universe of knowledge; and "Processing Materials" covers the activities involved in making sure items that go into a library's collection are properly identified as belonging to the library and where the item is physically located in the collection. All other chapters have been extensively rewritten and updated to reflect 2010 technical service functions and activities. Complete with helpful illustrations, statistics, and study guide questions, this text is a must for library and information science students!

Standard-Based Data and Information Systems for Earth Observation Dec 03 2020 CEOS was established under the auspices of the Economic Summit of Industrialized Nations in 1984 in response to a recommendation from a panel of experts in remote sensing within the Working Group on Growth, Technology and Employment (CEOS, 2009). The panel recognized the collective value of the world's Earth remote sensing capabilities and the advantages that would be gained by the coordination of civil Earth observing satellite missions. By cooperating in mission planning and the development of compatible data products, applications, services and policies, the national space programs would maximize the benefits of their individual investments and be able to better address the environmental challenges of the entire international community. CEOS was to serve as the focal point for this international coordination and to provide the forum for the change of policy and technical information. The members of CEOS are governmental organizations that are international or national in nature and are responsible for a civil space-borne Earth observation program that is currently in operation or in an advanced stage of system development. CEOS also has established Associate Members that are similar governmental organizations with a civil space-segment activity in an early stage of system development or those with a significant ground-segment activity that supports CEOS objectives. Associate Members may also be existing satellite coordination group and scientific or governmental bodies that are international in nature and have a significant programmatic activity that likewise is aligned with the goals of CEOS.

The Advanced Smart Grid: Edge Power Driving Sustainability, Second Edition Aug 30 2020 Placing emphasis on practical "how-to" guidance, this cutting-edge resource provides a first-hand, insider's perspective on the advent and evolution of smart grids in the 21st century. This book presents engineers, researchers, and students with the building blocks that comprise basic smart grids, including power plant, transmission substation, distribution, and meter automation. Moreover, this forward-looking volume explores the next step of this technology's evolution. It provides a detailed explanation of how an advanced smart grid incorporates demand response with smart appliances and management mechanisms for distributed generation, energy storage, and electric vehicles. This updated second edition focuses on the disruptive impact of DER. This new edition also includes a glossary with well over 100 acronyms and terms, acknowledging the tremendous challenge for a student of smart energy and smart grid to grasp this complex industry.

Defining IT Success Through The Service Catalog Feb 26 2023 The Service Catalog is a fundamental IT tool covering the services themselves, default capabilities, measures and primary means of access and provision. In short, it represents the value IT provides to facilitate business operations. Written by industry experts and using real case studies, this valuable title takes the reader beyond the theoretical to focus on the real business benefits of Service Catalogs and how to implement them successfully within an organization: Services are made standard and rational, leading to lower costs and increased service availability Standard service products enable forecasting of demand, leading to better volume discounts from vendors and improved inventory and capacity planning Controls over consumption of services are enhanced The fulfillment of IT services is improved with the catalog. Standardization of services leads to recurrent workflows, rather than relatively expensive one-off projects
