Final Report Standard Catalog of 4 X 4's Republic of Drivers New Trucks Prices and Reviews

Rising gas prices, sprawl and congestion, global warming, even obesity—driving is a factor in many of the most contentious issues of our time. So how did we get here? How did automobile use become so vital to the identity of Americans? Republic of Drivers looks back at the period between 1895 and 1961—from the founding of the first automobile factory in America to the creation of the Interstate Highway System—to find out how driving evolved into a crucial symbol of freedom and agency. Cotten Seiler combs through a vast number of historical, social scientific, philosophical, and literary sources to illustrate the importance of driving to modern American conceptions of the self and the social and political order. He finds that as the figure of the driver blurred into the figure of the citizen, automobility became a powerful resource for women, African Americans, and others seeking entry into the public sphere. And yet, he argues, the individualistic but anonymous act of driving has also monopolized our thinking about freedom and democracy, discouraging the crafting of a more sustainable way of life. As our fantasies of the open

road turn into fears of a looming energy crisis, Seiler shows us just how we ended up a republic of drivers—and where we might be headed. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} Without question, the 1964-1/2 Mustang is one of the most important and influential cars in automotive history. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty,

were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.
