[Project Management and Construction Operations Manual. Volume I - Project Estimation](#) Nov 01 2020 From its conception, a construction project is a magnet for organizational miscommunication, labor shortages, budgetary woes, improper planning, and a plethora of other problems that delay-or even prevent-completion. To succeed, the project manager needs a set of efficient systems and methods in place to minimize any unexpected difficulties. Moufid Abd-el-Baki has spent forty-seven years in the construction industry, bringing projects as diverse as airports, hospitals, cement factories, grain silos, petro-chemical projects, and high-rise buildings to successful completion. The Project Management & Construction Operations Manual encapsulates

Abd-el-Baki's extensive experience in a handy, three-volume format. In this first volume, Abd-el-Baki covers the challenges surrounding project estimation, the first phase in any construction project. He moves from estimating costs and selling prices to tender drawings, time schedules, contracts, and labor issues, supporting his efficient methodology with helpful exercises, templates, and charts. Possible difficulties are carefully explained and evaluated, and effective solutions are provided to resolve such issues. Project estimation is a complex field, one that must be carefully navigated to avoid issues later on. Abd-el-Baki offers a no-nonsense approach to this most important step in the project management process.

The Business Plan Reference Manual for IT Businesses Jan 16 2022 There is a great worldwide desire to launch new technology-based business. In this sense, and increasingly, entrepreneurship courses have arisen in several universities and many of the courses in the management, administration and engineering areas already offer entrepreneurship curricular units. Throughout those programs, the teams develop key integrated competencies in innovation, entrepreneurship and technology that will ultimately enable the students to create and develop new technology-based businesses. The Business Plan Reference Manual for IT Businesses provides a reference manual for undergraduate and graduate students that intend to launch their start-up business in the IT field. It helps them to create and model the business plan of their business. Therefore, this manual is mainly aimed at instructors who want to offer a practical view of the process of modeling, designing and developing an IT start-up. Additionally, it can be individually used by entrepreneurs who wish to launch their start-up businesses in IT field. The structure of the book was defined taking into account different approaches to the construction of the business plan, which basically consider a disaggregation of some of these chapters in others smaller (e.g., marketing plan into products/services and market, financial plan into investment plan and economic-financial projections). We chose to aggregate these dimensions into a single chapter, which in our view facilitates the process of analyzing a business plan. It is also relevant to mention the inclusion of "Chapter V - Prototype description" which is innovative and intends to take into account the application of this business plan template to the information technology sector.

Research and Technology Buildings Sep 23 2022 The significance of research and technology in today's economies is undisputed and continues to grow. Designing buildings to accommodate a range of functions, from laboratory experiments through prototype development to presentation and marketing is an architectural field of great potential. Commissioned by universities, public institutes and private companies, the challenge is to reconcile security and accessibility, laboratories equipped with sensitive, state-of-the-art instruments and facilities for theoretical research. Zoning, circulation and functional requirements, as well as the historical development and contemporary context of research building, are covered in the opening systematic chapters of this Design Manual. Following this some 70 built projects, largely from Europe, the USA and Asia, are analysed according to a variety of aspects such as urban integration and communications infrastructure. The authors, both from the internationally renowned Max Planck Society, and contributors draw on their own substantial practical experience of planning and building research facilities.

Planning for Power Advertising Sep 11 2021 This book is a step-by-step guide to producing a sound foundation for advertising: one that will serve as the springboard to inspire powerful creative expression. Rich in cases from the evolving Indian context, Planning for Power Advertising offers an understanding of how strategic advertising is created. It takes the reader through cases and analyses of what worked or did not work in the marketplace. Anand Halve involves the reader throughout in exercises with Action Points at the end of most chapters—an approach that brings alive the concepts within, and helps readers discover the theory in practice. For advertising professionals, this is a manual to create a robust advertising brief. For students of advertising and marketing, Planning for Power Advertising is a simulation exercise from which they will learn how to apply the principles that will help them in their future careers. And for professionals in areas related to advertising—such as media, event management and PR—this book provides an insight into how the strategic underpinning of advertising is built.

Floor Plan Manual Housing Feb 26 2023 The Floor Plan Manual Housing documents and analyzes 150 international housing projects since 1945. It shows the latest developments in housing and places them in the context of important examples from the past 65 years. This manual is distinguished by the typological and conceptual breadth of the projects it presents and by the extensive time period covered by the selection of examples. The selection of projects by established and still unknown architects is based first and foremost on the outstanding features of the floor plan. The focus is on projects that are exemplary and transferrable and on concepts that are innovative and trendsetting. A new feature - a diagram, a kind of figure-ground-plan, which accompanies each project - illustrates the unique characteristics and spatial qualities of each floor plan. These diagrams, the systematic and highly informative representation, and the typological description of all projects allow readers to compare and evaluate the floor plans and to be inspired by the ideas and strategies of others - for their own work on floor plans.
