Air power for peacekeeping and UN enforcement is a story that desperately needs to be told. In rich detail this volume describes: aircraft transporting vital supplies to UN peacekeepers and massive amounts of humanitarian aid to war-affected populations; aircraft serving as*

the 'eyes in sky' to keep watch for the world organization; and combat aircraft enforcing the peace. Rich poignant case studies illuminate the past and present use of UN air power, pointing the way for the future. This book reviews recent trends in the structure of OECD government securities markets and public debt management operations, and highlights the generic structural policy issues in emerging debt markets. This introduces the theoretical and practical guide of NOSES. The book introduced 10 different techniques of NOSES for colorectal neoplasms based on extensive high-quality surgical images. The first part mainly describes the development process of NOSES and the current achievements of these techniques which will provide readers a general understanding of NOSES. The second part elaborates on ten different surgical procedures specific to position of tumor location of NOSES in detail. All key technical points and operational skills regarding to NOSES are displayed by both high-quality images. The indications and contraindications are also strictly determined in this book. In addition to the elaboration of NOSES, each chapter of this book also conduct a detailed and comprehensive analysis the hot spots, technical difficulties and key issues with regard to laparoscopic surgery for colorectal cancer. This book is suitable for the colorectal cancer surgeons and doctors of general surgery.

Operation Seelöve var tyskernes forsøg på at invadere Storbritannien. Alle tænkelige transportmidler blev anvendt, intet var udeladt. Udover landsætning af tropper, skulle Luftwaffe anvendes fuldt ud. Seelöve blev afblæst, da Hitler vendte blikket mod Rusland. Have you ever wondered what the craziest and most insane missions in the CIA's history are? In this book you'll embark on a wild trip of some of the strangest, brutal, bizarre, and most head-scratching missions the CIA has undertaken and allowed to be declassified. You'll learn about the truth behind these missions, finding out the answers to some of the following: ? How and why did the CIA come to use sex dolls, and were they successful? ? Why did the CIA think cats could be used for spying? ? Who were the brains behind a CIA program to use LSD and sex to get information? ? How did the CIA use "fake news" to overthrow a Latin American country? ? How was a notable feminist used by the CIA? Are you ready to get your mind blown? Secret CIA profiles some of the insane brutality and illegal acts the CIA has done over its not-so-long history, yet you'll also see a side of the CIA that can make you think WTF were they thinking? This book has a little for everyone. If you're a history buff, you can look forward to reading about the history of the CIA, albeit from a truly unique perspective. If you're a trivia geek, then this book is sure to give you plenty of ideas. Along with the 21 stories of crazy CIA operations and people, there are four "Did You Know" sections that have five factoids about the CIA. You can use those sections along with the chapters to come up with your own trivia challenges for hours of fun with your friends and family. So, open the cover and begin your wild ride on 21 of the most insane CIA missions in history!

Book Introduction 15 years for plastic surgery of nose only! Nose plastic operation technique for the Asian people written by the foremost specialist of nose plastic operation in Korea! Since the cosmetic surgery began, lots of people have published the books for nose plastic surgery but most of them are focused on the western people. The standard of 'ideal nose' appeared in the plastic surgery textbook is also focused on the ideal type of western people. However, the structure of face line and nose of Asian people is basically different from those of western people. If the plastic operation is carried out by applying the standard of ideal nose appeared in the textbook for the face of Asian people, it is naturally unfamiliar or not comfortable. Dr. Suh Man Koon, the author of this book, has studied the nose plastic operation suitable for the face line of Asian people for a long time, based on various clinical experiences. The author who has experienced in the nose plastic surgery over 15 years felt the necessity of systematic training book acutely while training the medical teams who came from Asian countries to learn the advanced plastic operation technique of Korea. The author expressed his wish that this book will be helpful for those who want to learn the nose plastic operation technique for the Asian people

Atlas of Small Animal Wound Management and Reconstructive Surgery, Fourth Edition presents detailed procedures for surgical reconstruction and essential information on the principles of wound healing and wound management for dogs and cats. Coverage encompasses the pathophysiology and management of the wide variety of wounds encountered in small animal practice and the most current reconstructive techniques for closing the most challenging defects. This updated edition is presented with additional full color images and now includes color in each illustration, to enhance the reader's understanding of each subject and successful execution of the surgical techniques covered. It imparts new and updated information on a wide variety of topics, including skin and muscle flap techniques, skin fold disorders, facial and nasal reconstructive surgery, foot pad surgery, urogenital reconstructive surgery, and includes a new chapter on reconstructive surgery of the pinna. Provides a key reference for general practitioners, surgeons, surgical residents, veterinary students, and small animal technicians in a single source Discusses current and new wound management and reconstructive surgical techniques for all body regions, including the face, ear, mouth, eye, nose, trunk, external genitalia, and foot Contains 35 brand-new plate illustrations, updated and enhanced color plate illustrations and drawings, and additional clinical photographs throughout Features a new chapter dedicated to the surgical management of pinnal injuries and disorders, including new reconstructive surgical options developed by the author Includes information boxes to emphasize important points and the author's personal observations, drawing on more than forty years of surgical experience Atlas of Small Animal Wound Management and Reconstructive Surgery, Fourth Edition is a valuable one-stop reference for veterinary surgeons, residents, and small animal practitioners. Excerpt from Annals of Surgery, Vol. 21: A Monthly Review of Surgical Science and Practice; January-June, 1895 Of the sigmoid flexure into the rectum. AS soon as we have loosened the bowel at this point, it is remarkable with what ease it will follow on downward traction, more especially when the peritoneum has been incised on both sides of the bowel in the direction of the course of the latter. In doing this I have been repeatedly obliged to sever the two branches of the superior haemorrhoidal artery, which runs in the meso-rectum from the promontory of sacrum towards the upper part of the rectum. I cannot believe that the cutting off of this blood-supply is a matter of indifference, especially when we take into consideration that the superior hmmorrhoidal is, under the existing conditions, alone responsible for the nutrition of the upper end of the bowel, which is deprived of all collateral circulation from the middle and infe rior haemorrhoidal vessels. Its Vitality, moreover, has not been increased by the manipulations necessary to liberate it from the surrounding tissues. It has seemed to me, therefore, that in such cases it is wiser to resect an additional portion of the upper end of the rectum until we are well within the domain of other branches of the inferior mesenteric artery. This is not a difficult task. It is only necessary to incise the peritoneal folds on both Sides of the bowel, which are now the

main impediment to down ward traction, and to separate the rectum with the hand from the anterior surface of the sacrum as far as the promontory, if neces sary. The importance of complete relaxation of the sutured ends of the intestine cannot be overestimated. Even when we have attained this end and the rectum lies in the wound cavity without any tension, it later on becomes tense from in ammatory infiltration and perhaps some retraction of the upper end. At the point of resection we are without the guarantee of speedy peritoneal adhesion of the united ends of the bowel. We must depend entirely upon our sutures and the absence of tension for primary union, and how much less will be the chances for it to occur if slight tension already exists at the close of the operation. The part of the bowel most likely to suffer in its nutrition is the posterior distal portion of the upper end. I have a few times Observed circumscribed necrosis at this point, which has, how ever, not interfered with the final complete restoration of the intestinal canal when a temporary anus had been made. Given the rise of anti-Semitism in parts of Europe, the accessibility of "denial" Internet sites and the isolationist stand taken by certain European political leaders today, Holocaust teaching was given an important place in Council of Europe's history project. Although some countries have high standards for Holocaust teaching, others are lacking in material. This teaching resource is based on the work of such widely recognised authors as Raul Hilberg, Sir Martin Gilbert, Saul Friedlander and Christopher Browning, plus first-hand accounts, including those of Primo Levi, Hermann Langbein and Claude Lanzmann's interviewees. It offers teachers a body of knowledge for use in course planning and brings to the forefront facts and figures on victims often "overlooked", Roma/Gypsies, homosexuals, Jehovah's Witnesses. What emerges from the succinct descriptions of how and where this genocide was carried out is the comprehensiveness of the Nazi enterprise. On 21 May 1980, under the codename Operation Tiro-Tiro, 32 Battalion attacked and routed a FAPLA brigade at Savate, a small Angolan town 75 kilometres north of the border with South West Africa. Fifteen members of 32 Battalion were killed in the action and many more wounded. It was the highest South African casualty rate in a single skirmish since the start of the Border War. Overall, however, Savate was a significant victory for 32 Battalion. FAPLA suffered heavy casualties and the invaders captured a great many vehicles, weapons, ammunition and other equipment. Operation Tiro-Tiro, or the Battle of Savate as it became known, was the first time the SADF had engaged FAPLA in battle since 1975. And, despite the record number of casualties, it was 32 Battalion's biggest victory since its formation in March 1976. While the Border War came to an end in 1989 and 32 Battalion was disbanded in March 1993, to this day a remembrance service and parade is held annually on the Sunday closest to 21 May to commemorate the Battle of Savate and to remember 32 Battalion's victory and the price they paid. Drawing from official documents in the Department of Defence Documentation Centre that have only recently been declassified and from testimonies of soldiers on both sides, The Battle of Savate is the definitive account of one of the greatest battles of the Border War, describ-ing in detail the operation, its motivation and planning, its achievements and failures, and vividly recreating the experience of what happened on the ground. Excerpt from Methods and Costs of Gravel and Placer Mining in Alaska The route was then pursued westward over the ridge trail to Fair banks Creek. From August 1 to 5, inclusive, nearly all the operations in the recently opened Fairbanks district were Visited, including 3 operations on Fairbanks, Chatham, Cleary, Twin, and Pedro creeks. On Fairbanks Creek a junction was made with Mr. L. M. Prindle's party, and it is due to the fact that the two parties worked together in the Fairbanks district that all the operations were visited in the few days available. During the few succeeding days as much information as possible was collected in the town of Fairbanks con cerning the new gold finds of the Tanana, and my party then proceeded Via the Tanana, Yukon, and St. Michael to Nome, arriving there August 20. From August 21 to September 4, inclusive, 21 operation were inspected on Anvil, Glacier, and Dexter creeks and Grass Gulch, and on Newton, Peluk, and Dry creeks. Environmental policy. This book sets out the major social scientific approaches to the study of Special Operations Forces. Despite consistent downsizing, over the past two decades the armed forces of the industrial democracies have seen a huge growth in Special Operations Forces (SOF). Through increasing numbers of personnel and more frequent deployments, SOF units have wielded considerable influence in conflicts around the world, with senior SOF officers having led major strategic operations. This increased presence and unprecedented expansion for SOF is largely a result of the 'new' kinds of conflicts that have emerged in the 21st century. At the same time, even with this high profile in the military, policy and media and popular cultural arenas, there is relatively little social scientific research on SOF. This volume aims to fill this gap by providing a series of studies and analyses of SOF across the globe, since the end of World War II. Analysing SOF at the micro, mezzo and macro levels provides broad and diverse insights. Moreover, the volume deals with new issues raised by the use of such forces that include emerging modes of civilian control, innovative organizational forms and the special psychological characteristics necessitated by SOF operatives. It concludes with a discussion of a question which continues to be debated in today's militaries: what makes SOF 'special'? Filling a clear gap in the literature, this book will be of much interest to students of strategic studies, civil-military relations, irregular warfare, security studies, and international relations.

The Mikoyan-Gurevich MiG-21 is known in NATO circles as the 'Fishbed'. Designed as a Mach 2.0 interceptor, the plane holds the distinction of being produced in greater numbers than any other jet aircraft. The Fishbed flew in combat in Vietnam, where it held its own against the F-105 Thunderchief. During the 1973 Arab-Israeli War, 17 Israeli aircraft were shot down, for a loss of six Egyptian MiG-21s. The plane also flew in combat in the Indo-Pakistani War of 1971, during the Soviet invasion of Afghanistan, and in Yugoslavia. Today, over 28 of the world's air forces continue to fly MiG-21s. Originally printed by NATO, this English-language handbook provides a glimpse inside the cockpit of this incredible plane. The manual was recently declassified and is here reprinted in book form. Care has been taken to preserve the integrity of the text

Codenames were a vital feature of World War II, serving as mental shorthand for those in the know, and obscuring the issues for those who were not. Codenames were used from the highest level, in the planning of grand strategic moves affecting the conduct of the whole war, to the lowest command divisions, in the conduct of small-scale tactical operations. This encyclopedia, first published in 1986, removes the mystery surrounding many of the important code names from the era. With around 3,000 entries drawn from all sides – the U.K., U.S.A., Germany, the U.S.S.R. and Japan – Christopher Chant's work provides a uniquely comprehensive and full overview of major operations, names and code words. Thorough and exciting, this key reference reissue is an exceptionally valuable resource for military historians, enthusiasts and general readers with an interest in World War II.

Operations Strategy: Competing in the 21st Century addresses the basic decisions leaders of operations must address: vertical integration, capacity, facilities, process technology, information technology, sourcing, business process management, capabilities development and supply chain integration. In doing so, the book integrates strategic considerations with analytical models, thereby providing a comprehensive view of these critical decisions and the tools used to help make them. The themes and conclusions offered by the authors are based on recent research, particularly from the Leaders for Manufacturing program at MIT. Students and instructors can be sure that they are receiving the most up-to-date examples of companies engaged in making these decisions.
